

## FIELDS OF ACTIVITY

### Special machine manufacturing

- Construction
- Mechanic
- Steel Engineering
- Sheet metal manufacturing
- Elektric/Electronic/Programming
- Hydraulics/Pneumatics

### Area of business

- Rubber process procedures and plants
- Wood process procedures an plants
- Logistic plant
- Packing machines and plants
- Machines and plants for different terms of business

### CUTTING WORK

- CNC-turning
- CNC-milling
- CNC-sheet metal manufacturing
- CNC-large part processing

### INSTALLATION-REPAIR-SERVICE

- mounting new/dismantling old plants/machines
- installation plants/machines
- 24h spare part and repair service

# GENERAL CONTRACTOR ■■■■■

Complex installation systems from one company – in accordance with this motto we supply machines and production plants worldwide to well-known companies in the sectors of packaging technology, the rubber processing industry and process engineering. Our partners include the food processing industry, wood processing companies, the automobile industry and manufacturers of photographic paper and ceramics.

We are in the position to produce the most complex machinery requirements at all stages of development and with all components entirely in our company.
