

design, manufacture and marketing of industrial equipment

Gorenje Indop is a medium-sized machine building company. Our core business involves design, development, manufacture and marketing of various types of industrial equipment from individual devices, appliances and machines to the most sophisticated computer controlled manufacturing lines. We specialise in project engineering, *from concept to implementation*, in numerous technological fields.

- 190 highly skilled employees with relevant experience in various fields.
- Over 35 years experience in providing solutions for the most demanding projects.
- 5300 m² of workshop and assembly areas featuring state-of-the-art equipment.
- State-of-the-art engineering design offices in Velenje, Ljubljana and Novo mesto.
- ISO 9001:2000, EAQF and ISO 14001 certification.
- Numerous references in important industrial branches, primarily from the manufacturers of household appliances and the automotive industry.
- 100% owned by Gorenje d.d.

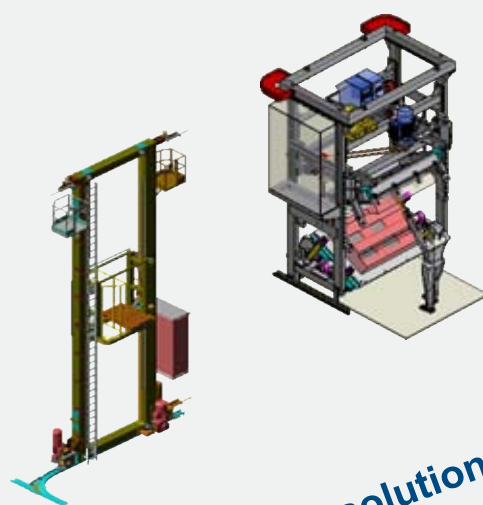

Business Activities

- Consulting, studies and conceptual design.
- Development and engineering design of industrial equipment.
- Construction of machines, devices and lines.
- Assembly, start-up and servicing.
- Turnkey solutions.
- Acting as agent for foreign companies.

Technological Fields

- Sheet metal processing and forming equipment.
- Equipment for polyurethane (PUR) foaming.
- Assembly systems.
- Storage management systems and conveyor systems.
- Lifting systems.
- Custom designed equipment

the way to find optimal solutions

➤ Sheet metal processing and forming equipment

- hydraulic and eccentric presses (drawing cushions, shock absorption of cutting force, automated operation,...)
- purpose-designed lines
 - sheet-metal processing by drawing, punching...
 - forming, welding
- conveyor- and feeding devices and accessories (lubrication, transport, manipulation,...)

➤ Equipment for polyurethane (PUR) foaming

- household appliances industry:
 - lines and machines for cabinet- and door foaming
 - plugs, moulds
- automotive industry:
 - lines for the manufacture of parts and components
 - stand-alone machines
 - turntables
 - manipulators.

➤ Assembly systems

- product assembly lines
- conveyor systems
- manipulators
- feeding devices
- outfitting of assembly workstations.

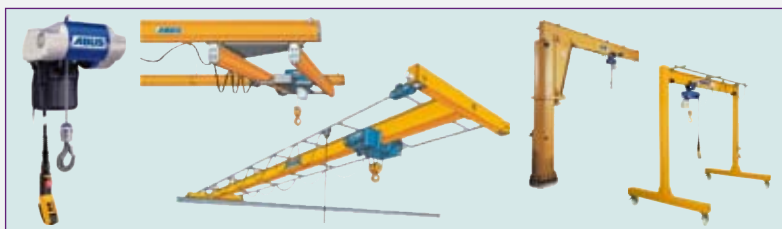

➤ Storage management systems and conveyors systems

- conveyor equipment
 - conveyors
 - rollers, lifting tables, storage racks, ...
- manipulators (purpose designed, general purpose)
 - storage bay lifts, loading stations, robots, ...
 - forklifts, cranes, ...
- steel structures
- system management.

➤ Lifting systems

- manual balancing units
- chain lifts and jennies
- lightweight gantry cranes
- console-mounted cranes
- suspended rail systems
- gantry cranes.

➤ Equipment designed subject to customer requirements

- manufacture of complex systems subject to customer requirements
- other.
