ADVANTAGES

Minus multiplied by minus equal plus? We – at Häsel Metall Technik (HMT) – prefer only to calculate with plus factors – the calculation of the client should even come out. Consulting and construction, stamping and forming technology, the surface technology, the component manufacturing as well as logistics and delivery: as a global provider we score in all disciplines. You will benefit as well as from an excellent individual performance as well as from tailor-made systems which are ready for use and are the result of a workflow coordinated entirely and perfectly. Problems with cut surface and delays? Not with HMT. Instead we are representing an established expertise, the most modern technology, a superior in-house production depth, a smooth communication and inventive solutions.

WE THINK
FURTHER THAN
OTHERS

THE BETTER MIGHT WIN

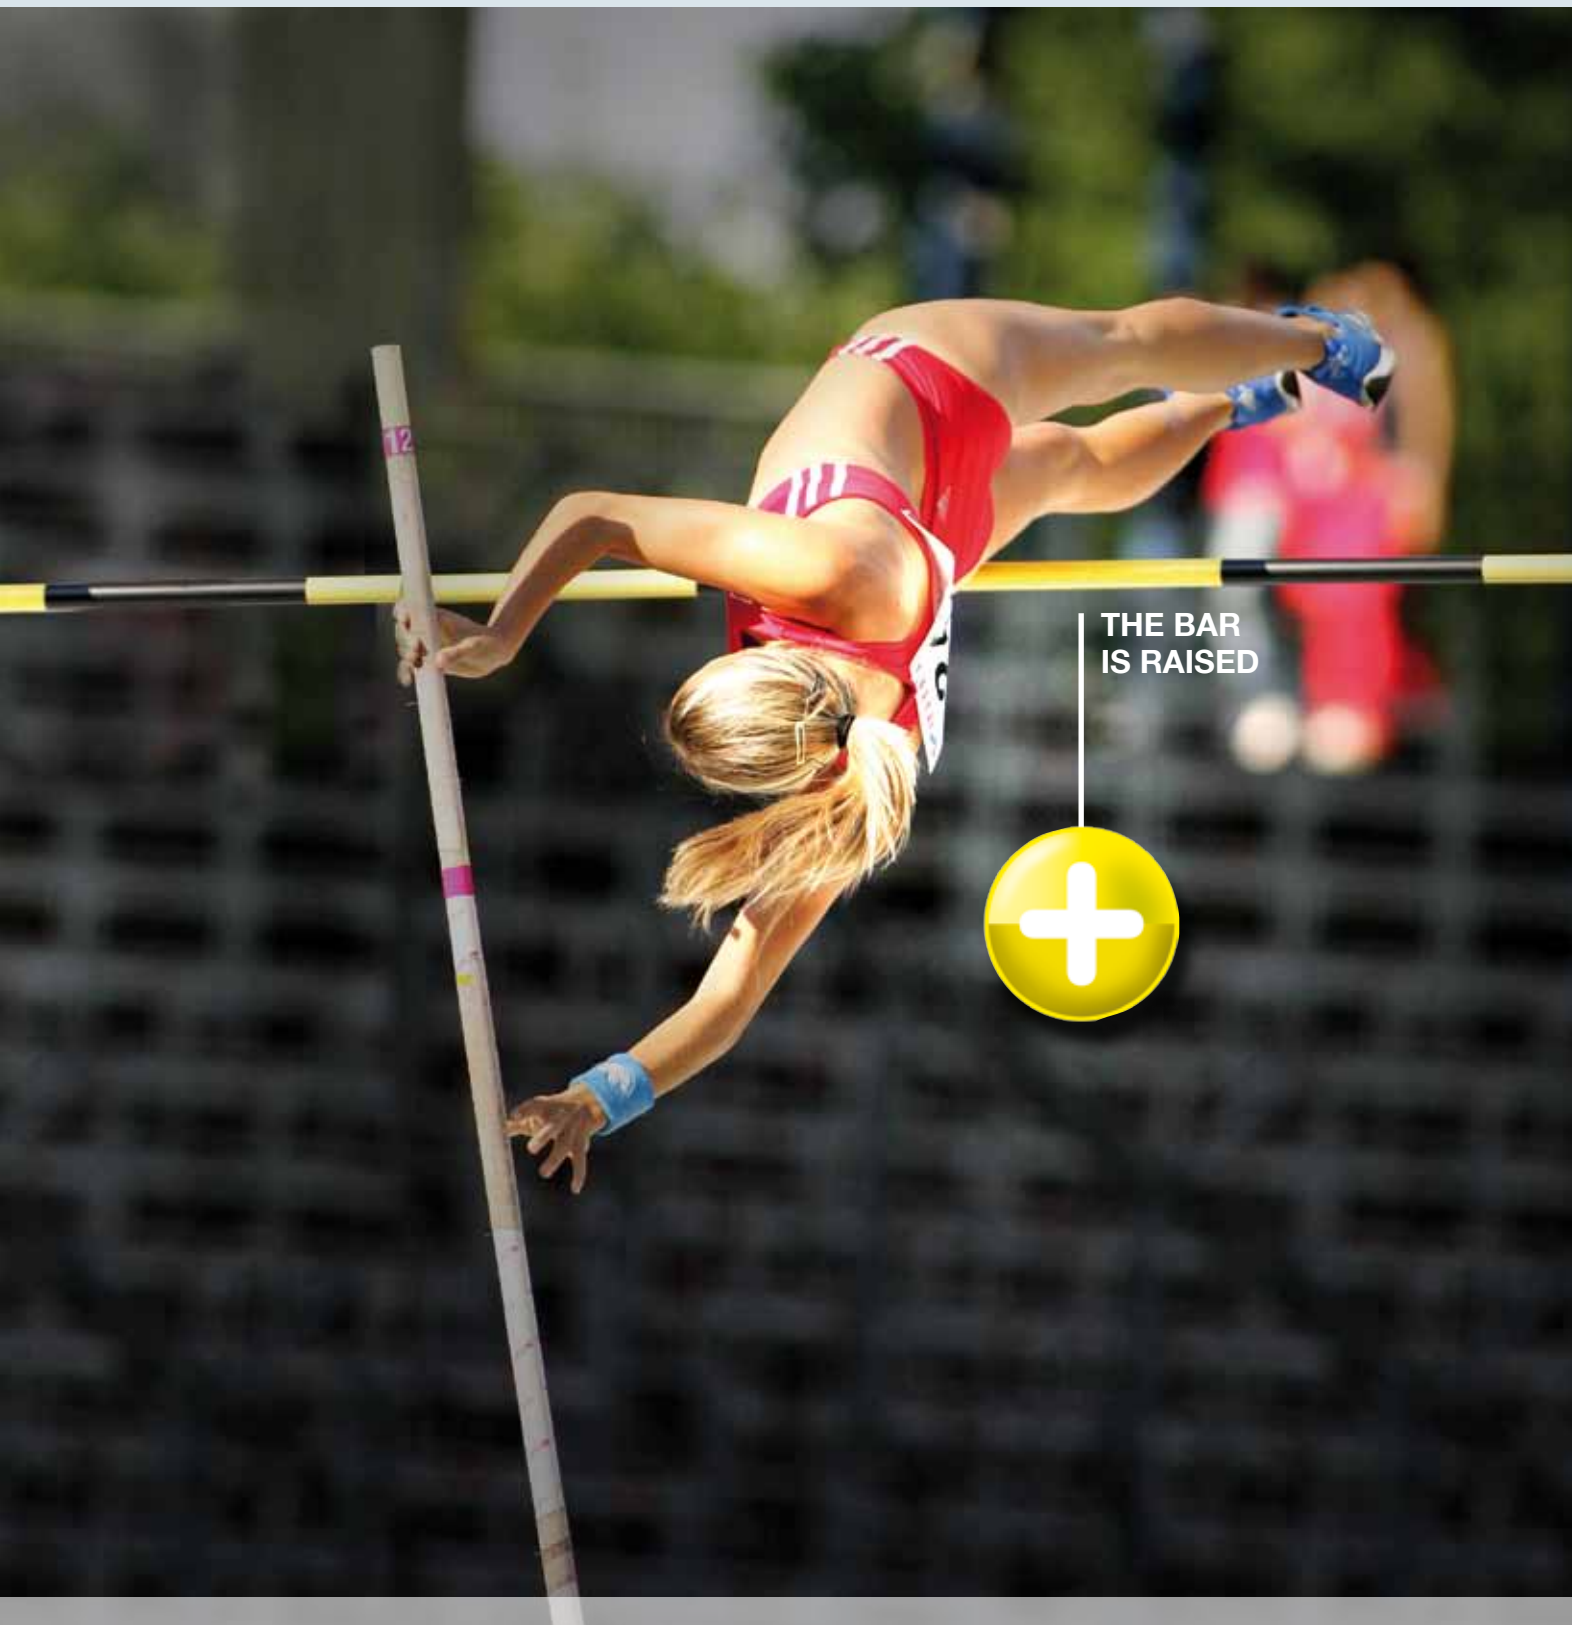

Better is the enemy of good. But only if potentials of improvement are recognized and used. In both we are specialists. If we are talking about stamping, forming and cleanliness or the assembly: as an experienced and flexible developer of processing and engaged solver of problems we are keeping in touch with our clients closely – consulting and elaborating convincing, individual solutions according to a “Simultaneous Engineering”. It is true: the earlier HMT is involved in a development the more efficient the result and the higher the saving of material and time. We definitely know how to construct your requested part suitable for production. A knowledge which might influence up to 70 % of your production expenses.

04 / 05

„People get rather motivated
by other people than by
projects.“
Robert Schild,
quality management

IN EXCELLENT CONDITION

The combination is essential – which is true especially for our high-quality stamping and forming technology. A very economical production of devices and systems works by an intelligent HMT jointing technology and the combination of different production technologies. Raw materials, length of tools, time: as a client of HMT you will save your money threefold and sustainable. The key to constant competitiveness.

High-performance tools, projected and realised by ourselves, a provident and detailed planning of processing and first-class technical equipment will offer the best premises for an ideal stamping and forming. Within our modern machinery we are processing coils of a thickness of up to 3 mm and a width of up to 600 mm. This works of course for blank and pre-zinc-coated steel panels as well as for all other raw materials. High definition in large scales and in excellent condition.

„The stamping and forming technology at HMT is up-to-date.“
Sergej Timoschenko,
shift supervisor

A PURE FIRST CLASS PERFORMANCE

Sheet metal forming is versatile. The same versatile as the kind of dirt it is leaving on the surfaces: oil, grease, emulsion, abrasion, chips, tinsel ... Facing a constant growing demand of even smaller electronic components the requirements to the appearance of metals are increasing as well. For usual cleaning equipment cannot provide the requested degree of cleanliness we have created a unique solution by means of our HMT typical inventing skills:

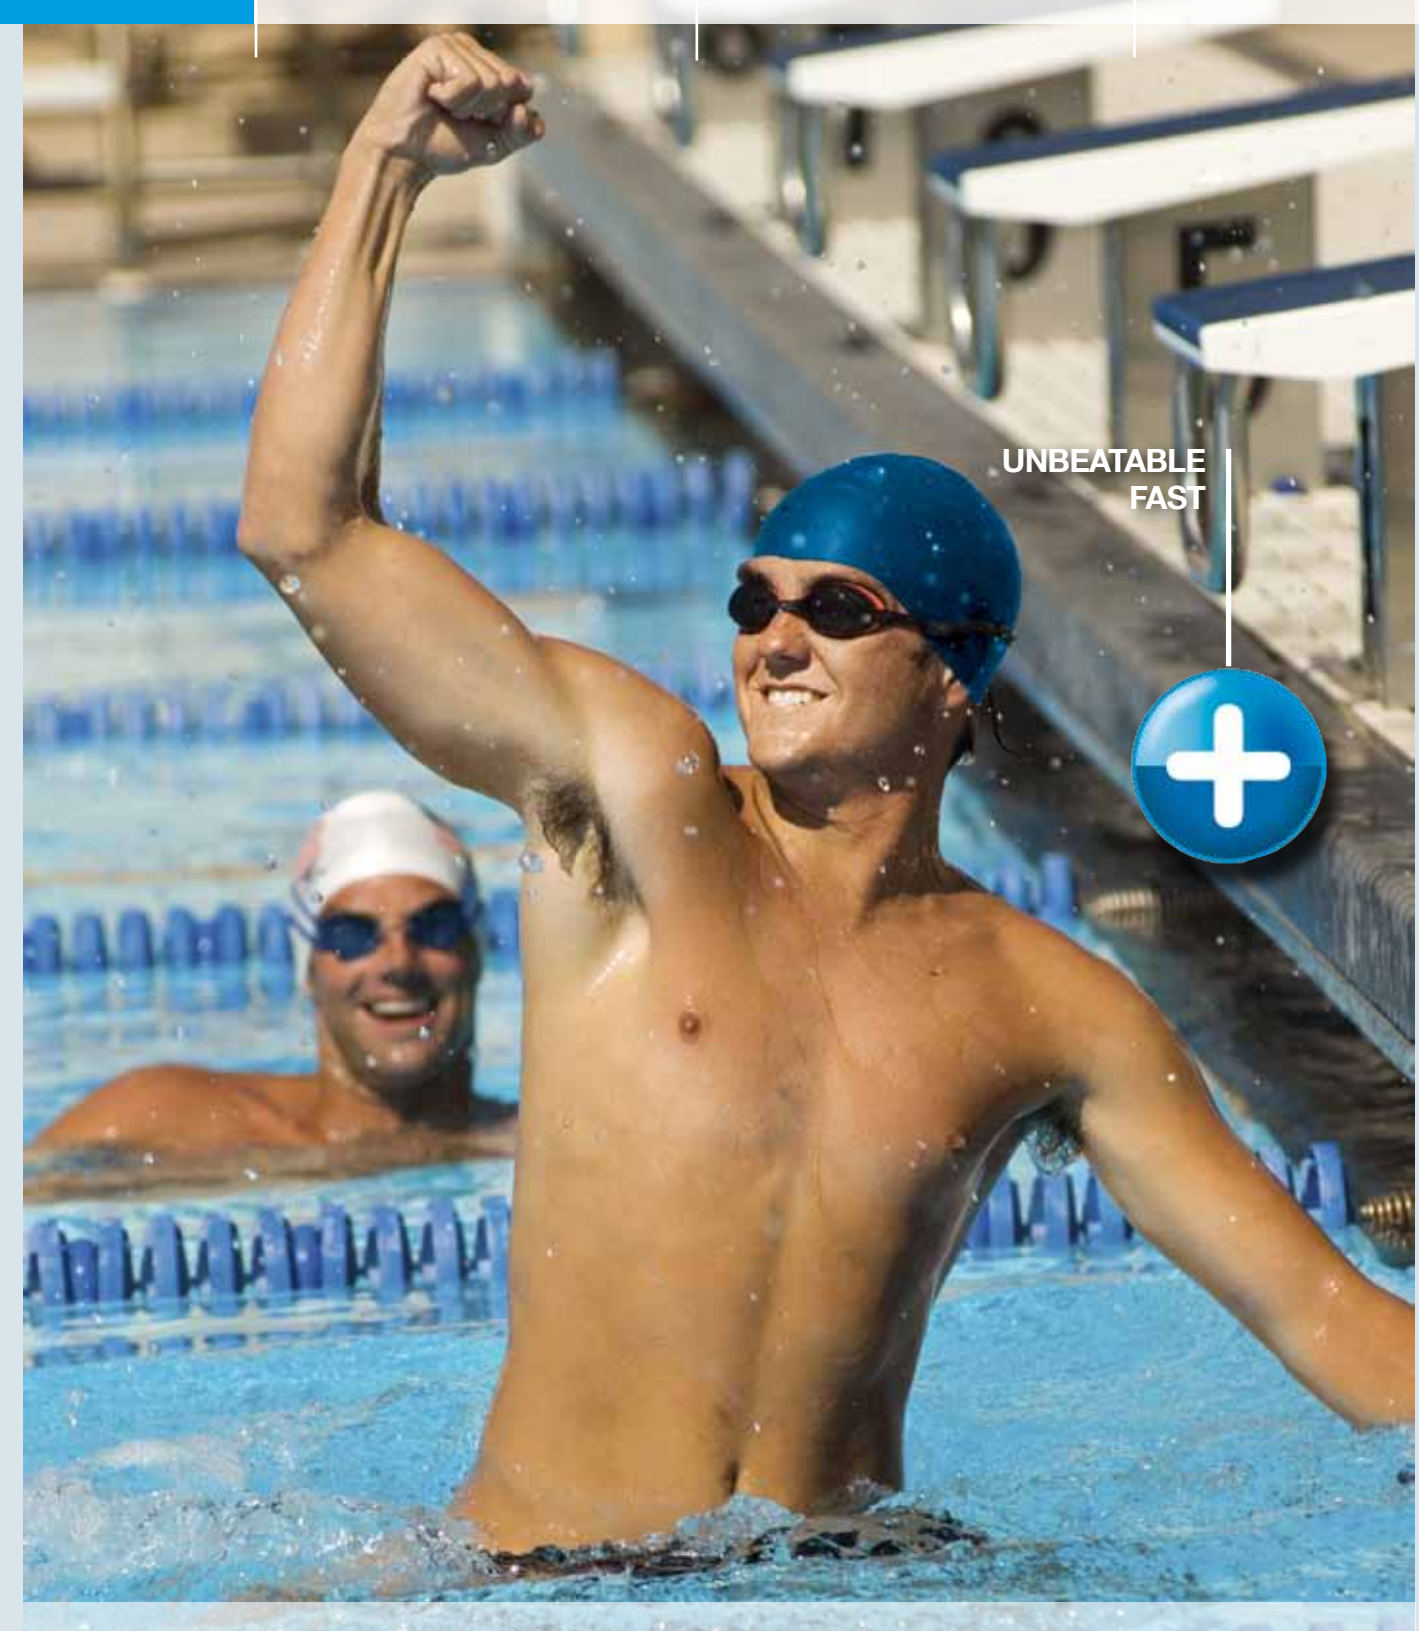

A shower water facility in seven zones including shiftable bonderizing working quite eco-friendly, energy-saving, economic and powerful. With a maximum outlet of about 3,000 x 1,000 mm it is preparing metal parts in high or low volumes for a sequential processing.

Our surface technology is highly appreciated for its reliability and is also submitted as contract cleaning process to a lot of our clients. The testing and documentation of the achieved "technical cleanliness" is made according to the standard of VDA volume no. 19.

„There are no high-quality clean surfaces without any effective cleanliness technology.“

Uwe Kunz,
shift supervisor production
control/surface technology

UNBEATABLE
FAST

AHEAD WITH
CONFIDENCE

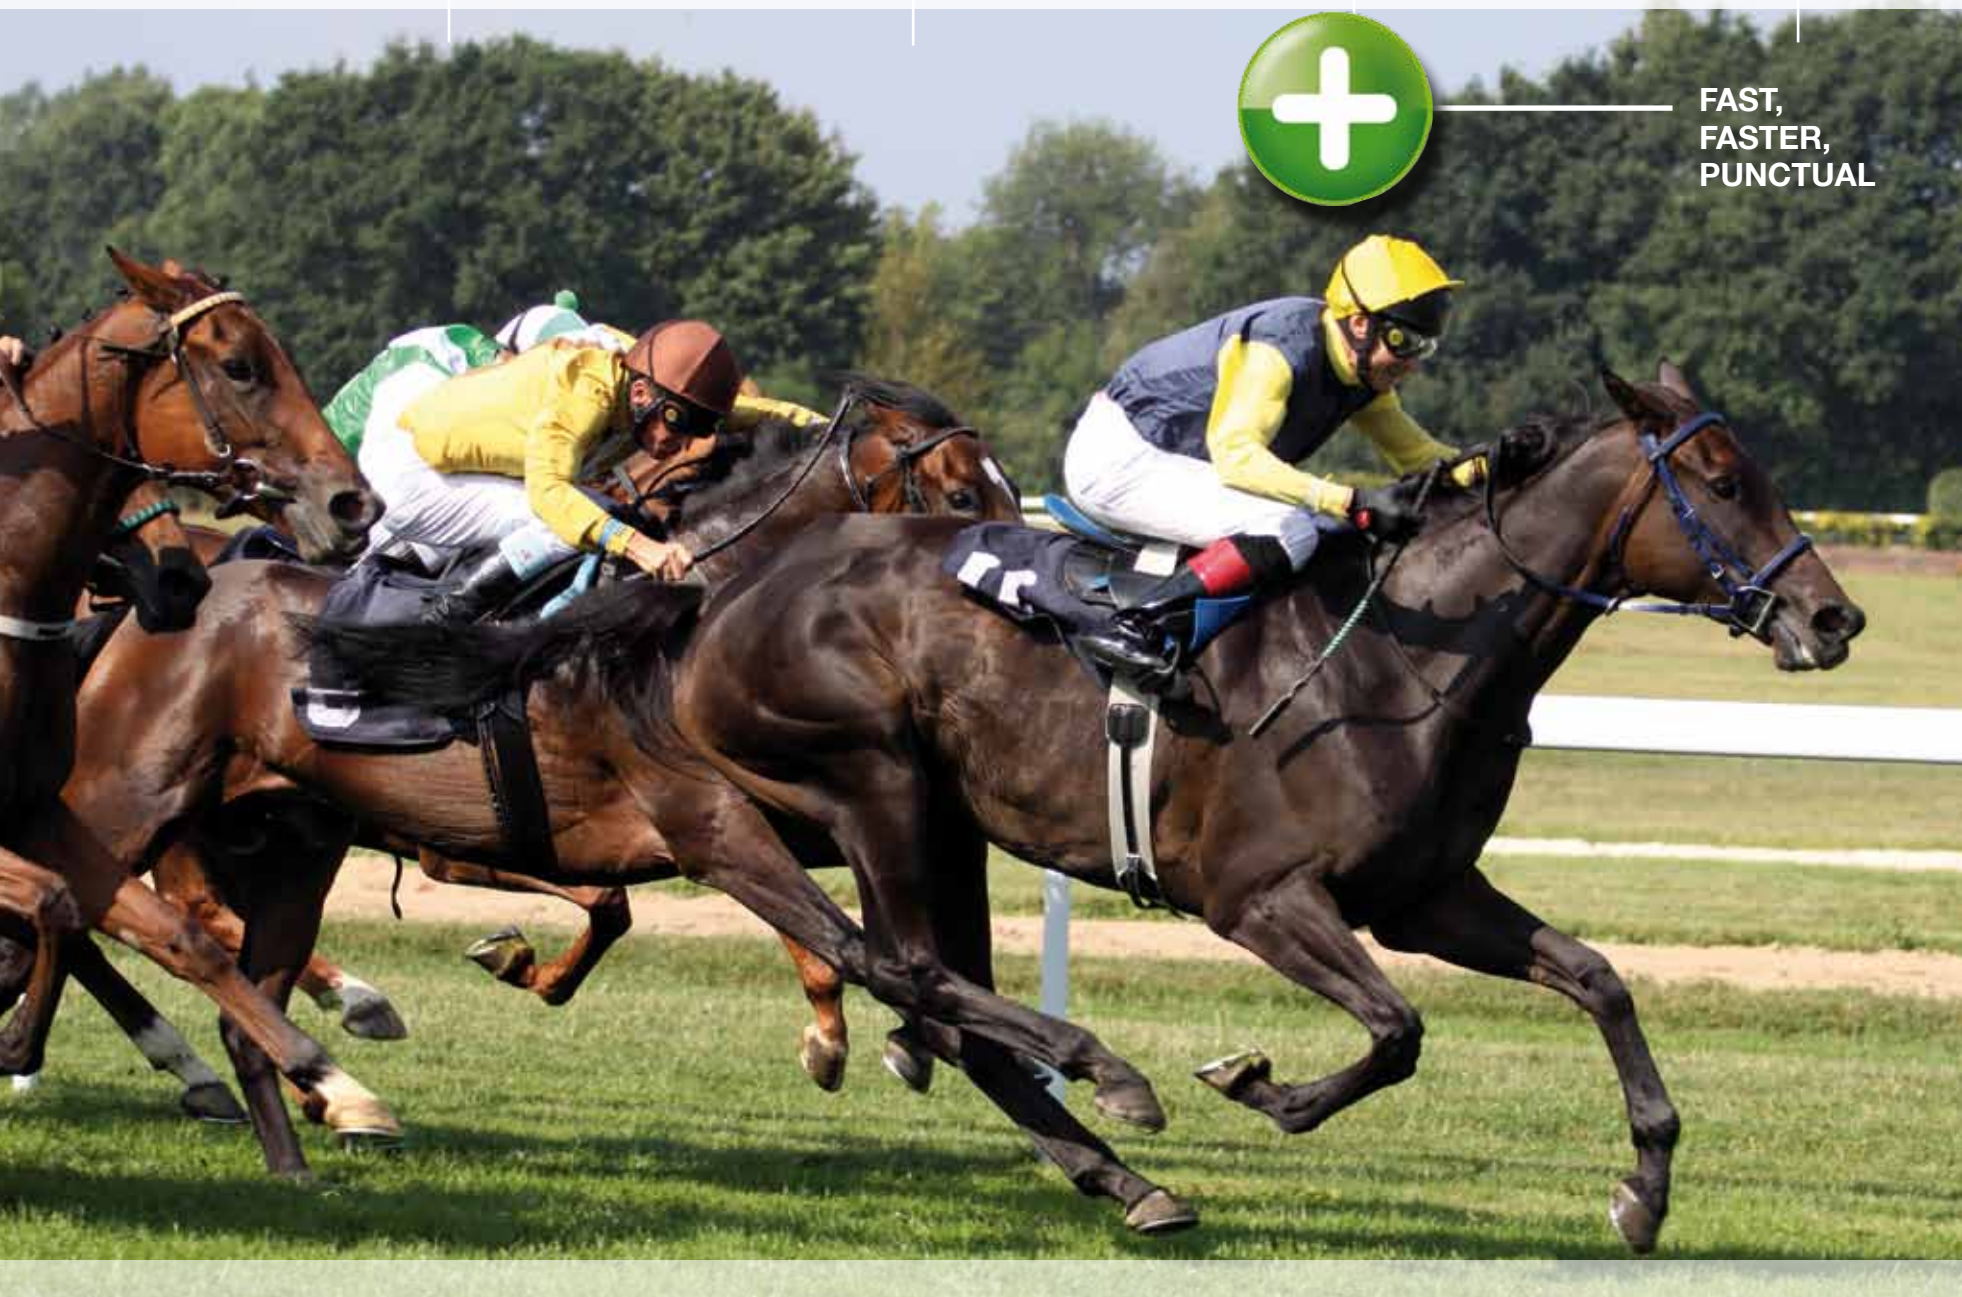

IT ALL COMES DOWN TO THE WHOLE ISSUE

Our company is a strong high-quality and individual performer. On one hand. On the other hand our company is characterized by a global analyzing, planning and acting. A component is not finished for us when it is true to size. The utilisability counts. As a global provider we are specialist in terms of utilisability. From individual components and functional assemblies with metal bearing we are producing complete functional and economic assemblies and systems.

Welding, riveting and drilling, rubbing, grinding, threading, bonding: all our producing and process technology are adjusted permanently to the latest stage of development and combined according to the task. Thus, our complete solutions succeed – in a flexible, individual and trend-setting way.

„The component manufacturing at HMT is excellent!“
Waltraud Lawitzky,
merchandise planning

FAST,
FASTER,
PUNCTUAL

TIME OUT? WE DO NOT KNOW.

Whenever you want, wherever you want. We store your parts and provide them exactly at any time and any place. For our vast HMT logistics services are part of our unrivalled range of services. We will either turn your annual forecast into ours or deliver the quantities needed reliably and to fixed terms. Or we will meet—within 48 hours – customer's short-term requirements.

Superior service know-how and the capacities needed are as well available in the area of cleanliness and surface technology – we are experienced contract cleaners. And we always are in favour for our customers: you can rely on the technical service from HMT and the fast, intelligent solutions. As well during irregular service hours.

„Our logistics: flexible and fast.“
Gökçen Sarıkaya,
store management
logistics department

REQUESTED “START AND AIM VICTORIES” ALL OVER THE WORLD

“Less is more” – this might be correct within other areas of life but not within our philosophy. There is no “less” at HMT – we always try to offer more. Considerably more than the usual. No matter if it is an individual performance or a complex one – we always find a suitable solution for each task, for each client as experienced manufacturer for complete solutions and inventive problem solver. This is definitely not an empty formula. This is demonstrated by a lot of faithful and well-respected clients which make use of our excellent HMT portfolio for years and all over the world. And typical for HMT: of course we have much going for references. We are the requested partner of a variety of industrial sectors: with focus on Automotive as well as the data processing technology, the engineering, the electrical industry, the control systems, the telecommunication...

AN OUTSTANDING
PERFORMANCE

„The secret of success is the permanence
of the aim.“
