SISTO-C Diaphragm valves for sterile applications

Applications:

Hygienic and sterile handling of fluids in the food, beverage and pharmaceutical industries

SISTO-CT

SISTO-C Diaphragm valves for sterile applications

- Maximum service life and pressure limit (PN16)**
thanks to enclosed and spiral-supported diaphragm;
operating pressure up to 20bar
- Simplified installation and control of the drain angle**
Self-drained; drain angle indicated by laser marking
- Optimum conditions for fluid purity**
due to valve hydraulics without dead volume
- High energy efficiency**
Lower pressure losses thanks to optimized flow profile

Materials

Body	1.4435 ; 1.4539 and different Hastelloy qualities
Bonnet	1.4409
Diaphragm	EPDM, TFM-bonded, TFM/EPDM 2-pieces

Excellent functional reliability

The floating diaphragm suspension prevents damages of the diaphragm

Reliable Operation

The stem and all internal operating elements are not in contact with the fluid

Reliable sealing to atmosphere and absolutely tight shut-off

The diaphragm provides hermetic sealing
