

GIACOMAZZO AGOSTINO SRL

INTEGRATED PLANT SOLUTION

**MIXERS e
TRANSPORT SYSTEMS**

MIXERS

GENERAL FEATURES

Our mixers reflect the high quality of the solutions arising from the extensive know-how in process technology: the set-point of the individual components in accordance with the mixed product up to the selection of specific materials in combination with the most modern production technologies.

All our mixers are designed to measure and according to the needs of each customer.

ATEX MIXER WITH HOT WATER HEATING

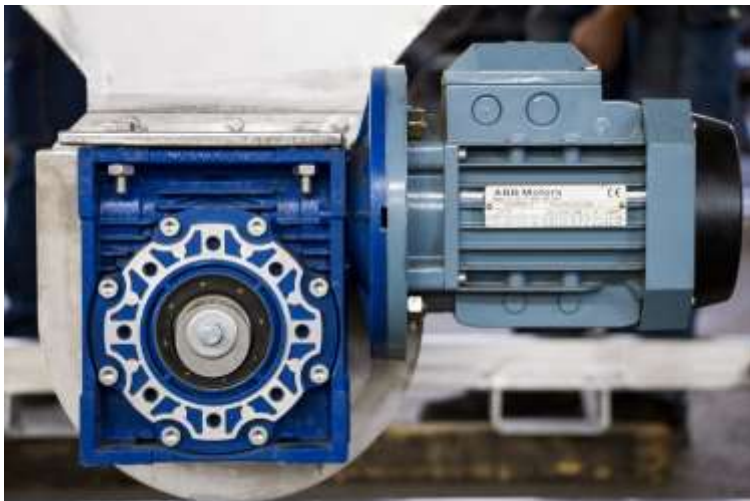

TRANSPORT SYSTEMS

GENERAL FEATURES

Our expertise and experience in mechanical design allow us to meet the needs of the customer who needs light or heavy material transport systems. We can build many different transport systems by using the most suitable materials for use as abrasion-resistant and corrosion-resistant materials.
