WHO ARE WE?

Fazekas Trading and Service Ltd. has more than 30 years of experience in metal-working. In our activities, our primary goal is to meet individual requests. Please feel free to learn about our activities and contact us!

OUR ACTIVITIES

DESIGN

In absence of proper construction, our engineering team will design the machinery most suitable for your vision.

CUSTOM MACHINERY AND PARTS PRODUCTION

The production of machinery and parts is personalized to the custom products and specific needs of our partners. On request, we renew, modernize old machines or replace worn parts.

MEASUREMENT AND REMODELLING

Rely on our measuring instruments, our partners can be sure about the accuracy of their parts and machinery. We create a report of the measurements. Our tools and softwares allow us to remodel and then produce the components based on a sample piece if it is necessary.

POST-MACHINING

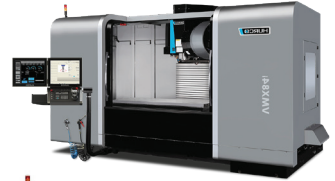

With small, medium and large series of rework, we are at the disposal of our partners at our premises in Mosonszolnok. For more information please contact us.
