- Oztug Otomotiv staff will provide all information to visitors and accompany them during the visit.
- Taking photos and videos in the plant is subject to management permission.
- ♣ In a possible emergency, fallow the instructions of the person accompaying to you. When you heard the alarm sound, stay calm. Alarm may represent the time of break. Please go to the emergency meeting point as soon as posibble with the warning and supervision of your companion.
- Oztug emergency meeting point is around the security entrance.
- ♣ Follow the internal Covid-19 precaution. Keep your social distance and please do not take of your mask.

OZTUG FROM PAST TO THE PRESENT

In 1990 2 We are countinuing our work with 276 personel.

♣ 1990- Esatablishment; machine-free prodcution was realized.

■ 1997- Rubber machinery investments were made.

♣ 2002- Toolshop investment was made.

2003- Plastic Injection investment was made.

♣ 2005- Production started in NOSAB.

♣ 2006- ISO TS 9001 Certificate was obtained.

♣ 2007- Production started in Adapazarı.

№ 2011- ISO TS 16949 Certificate was obtained.

♣ 2013- Production started in HOSAB.

2018- IATF 16949 Certificate was obtained.

♣ 2018- Lean management working was started.

♣ 2018- "design Center Approval" was obtained from the Ministry of Science, Industry and Technology.

VISION

To create our products with our lean management by making small and medium sized plastic, rubber and wire parts, plastic injection, rubber vulcanization, CNC wire bending process that our company carries out R&D designs to the industrial sectors on the global platform and present it to the our customers with a high satisfaction level.

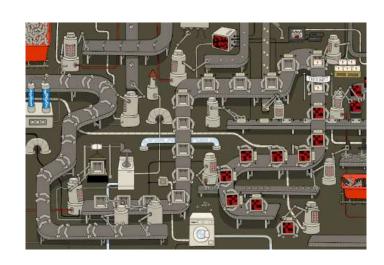

MISSION

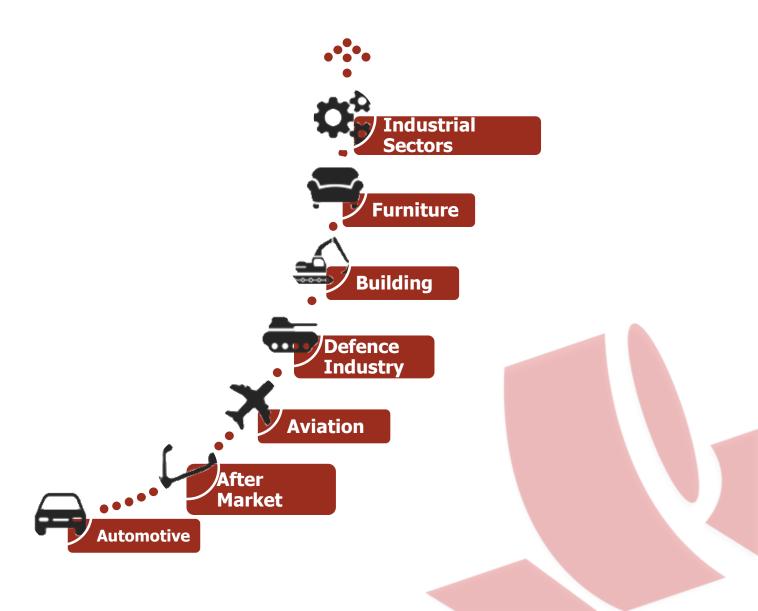

To maximize our technology and design skills in the understanding of total quality and continuous improvment, to be the leader in the sector by providing the most effective and efficient service.

In the globalizing World, to ensure the continuous satisfaction of all our stakeholders as one of the leading export companies in its field with its lean strategy purified from waste.

SECTORS WE SERVE

ASSAMBLED & TAMPON PRINT PARTS

Machine tonnage capasity - 50 tons - 600 tons

■ Maximum table size - 835 x 835 x 880 mm.

Maximum production volume 2500 cm³

Dehumidification systems - On-machine dehumidification/Gel dehumidification

♣ We serve for plastic production with totaly 47 injection machine and %90 of them is Arburg branded.

RUBBER GROUP

- Machine tonnage capacity 60 tons 250 tons
- We serve with;
- ♣5 pcs. Rubber Injection Machine
- 23 pcs.Rubber Vulcanisation & Compression Machine

WIRE & SHEET METAL GROUP

We serve with;

6 pcs. wire bending machine which 2 of them are designed and manufactured by OZTUG

Sheet metal forming press capasity is 20 tons - 250 tons (5 pcs. Eccentric Presses)

CNC 4 axis spot welding machine/ABB Gas arc welding machine/Lenght finishing machine/ Tube bending machine/CNC drilling machine which designed & manufactured by OZTUG

MEASURMENT CAPABILITIES

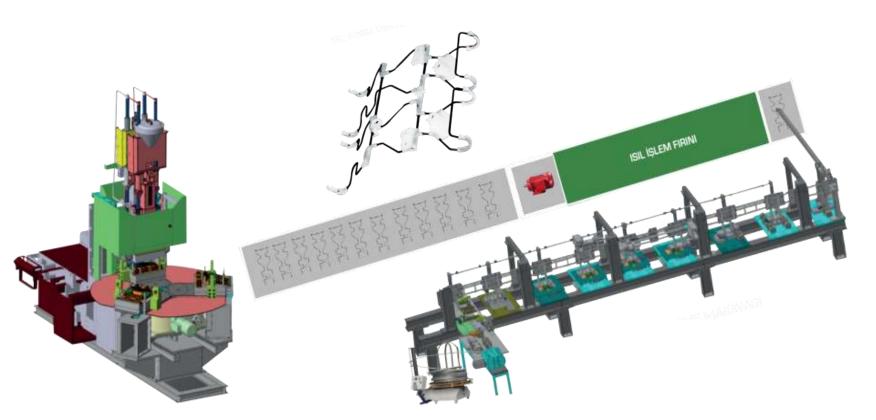

- ♣ 3-D Scaning (GOM ATOS/CMM DEA)
- Profile Projection
- Tensometer (Pull Breakage)
- Rheometer
- Agining Cabin (ETÜV)
- Hardness Measurment
- Density Measurment

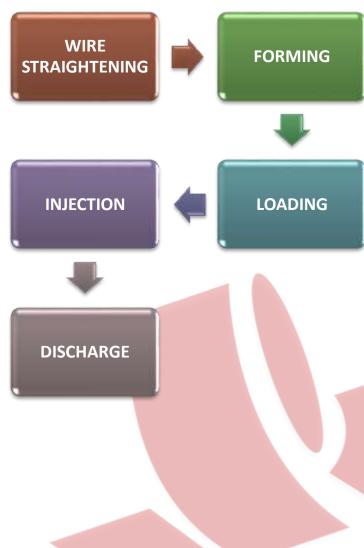

- Coating Thickness Measurment
- Flammability
- Glossmeter
- DSC Test
- Humidity Rate Measurment
- ♣ IRHD Micro Hardness Maesurment
- Surface Roughness Measurment
- Force Measurment

SPECIAL PRODCUTION CAPABLITIES

Front Cushion Seat Prodcution Line

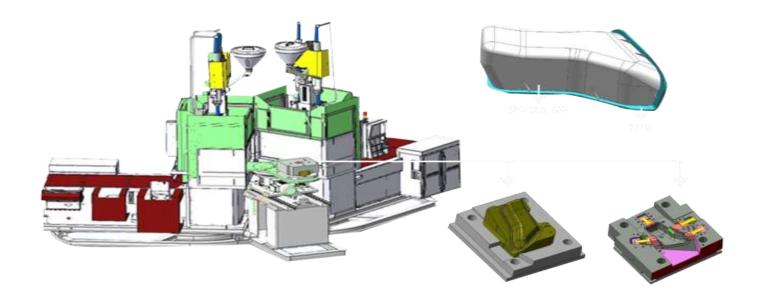

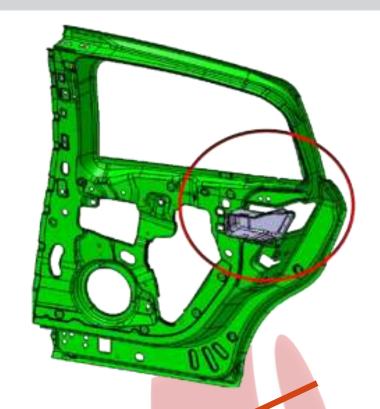

SPECIAL PRODCUTION CAPABLITIES

CO-INJECTION LINE CREATED BY OZTUG AUTOMOTIVE WITH ITS OWN R&D

If the manufacturing is supplied from outside 700.000 €

Cost of results within Oztug 300.000 €

MOLD MANUFACTURING

PLASTIC MOLD

RUBBER MOLD

SHEET METAL MOLD

CONTROL FIXTURE

WELDING FIXTURE

ASSAMBLY FIXTURE

SPECIAL MACHINE & APARATUS DESIGN

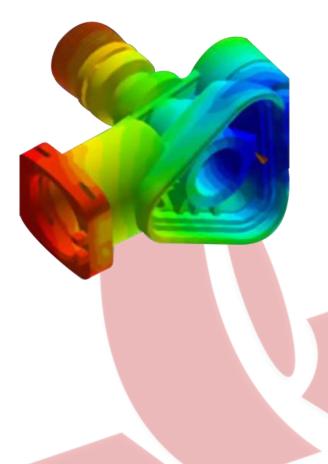

MOLD SURFACE POLISHING

MOLD MANUFACTURING GROUP

We serve with 24 pcs. machine that;

- ♣ Maximum table size 2000 x 1200 x 1000-6 pcs. 3 Axis Vertical Processing Bench
- Maksimum tabla ebatı $850 \times 700 \times 500$ -3 Adet **5 Axis Hermle Processing Bench**

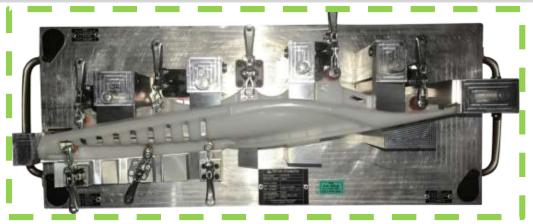

Wire Erosion / CNC Sinking Erosion/CNC Lathe /Laser Welding and Marking / Deep-hole drilling and Surface grinding

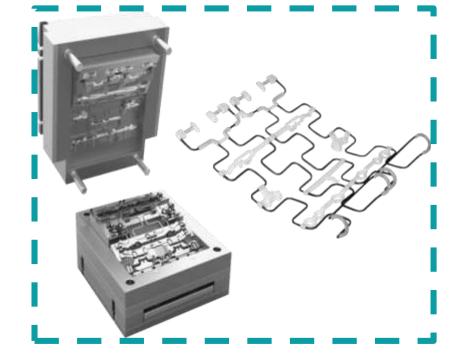

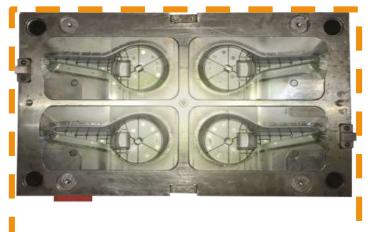

QCD AWARDS

•Toyota Boshoku Türkiye -2010

•Toyota Boshoku Türkiye -2013

GROWTH TREND

Correct Method

→ Using with lean

management systems

Correct Vision→ With an unlimited devolopment

strategy

Correct Human Resource → Devolopment of competent

/ Ready / correct staff network

Correct Substructure
Focused on Industry 4.0

With Industry 4.0 Studies;

In all areas of prodcution,

In all Logistical applications,

We will carry out processes where quality will be managed with smart autonomy.

We will create smart value chains..

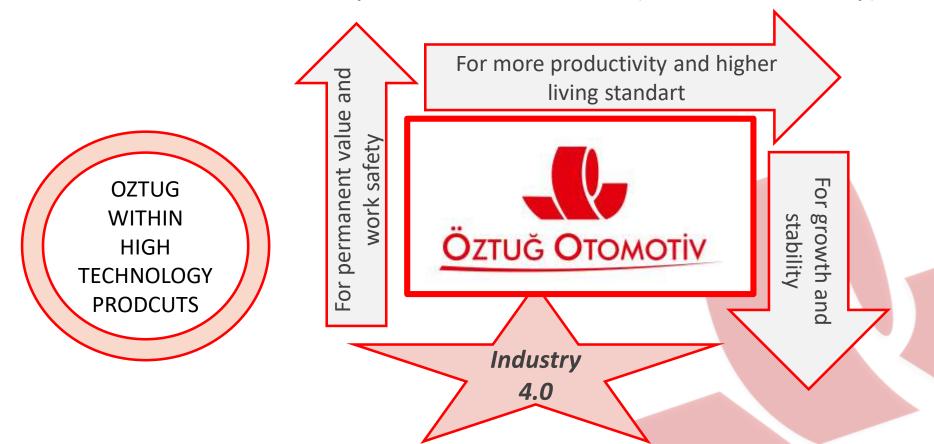

• "In the next 10 to 20 years, about %47 of the jobs we know now will disappear due to technological devolopment."

Carl Benedikt Frey & Michael Osborne (Oxford University)

The Dijital revulation not only "touches" every point of our lives, but also "shapes" it..
