

A COMPANY OF VALUES

Research, innovation and precision: **every aspect of the production process** is aimed at effectively meeting the needs of the individual customer.

EXPERIENCE

More than 30 years

Our expertise is at your disposal. In Akron Group, **technique, experience and vision count**; in this way we can make a difference for our customers.

RELIABILITY

Count on us

You can count on us and on the **realities that have already chosen us**. The various departments work closely together to ensure the highest quality of the finished product.

QUALITY

High standards

Our work complies with high quality standards so that each finished product complies with **international certifications** and characteristics agreed with the customer.

OUR KNOW-HOW AT YOUR SERVICE

FOUNDED IN 1987

Akron Group originated in **Sovere back in 1987**. It started as a family business, which then evolved thanks to the hard work and professionalism of the people who chose to **share this growth path**.

WHERE WE ARE TODAY

Today we have five offices in two countries, and a staff of **349 people** who share our passion, quality and drive for **continuous improvement**.

OUR FUTURE VISION

We have **high ambitions and expectations** that are based on solid assumptions. The aim is to **grow by sharing cutting-edge projects** with our customers.

OUR VALUES

GREEN SOUL

Every year we produce more than **3,000,000 kWh** from rapeseed oil and photovoltaic panels. We think Green.

R&D

Research into innovative production processes and materials is the goal that drives our R&D team every day.

ACADEMY

Internal training process in which each employee complements and passes on his skills to the team, creating transversal professionalism.

SHARING THE «FEEL GOOD»

Akron Group has always been active in the area to **support associations** and help those in need.

WE PROCESS PLASTICS TO MEET YOUR NEEDS

We are involved in moulding and converting plastics into high-quality products.

COMPANY

Our secret is maximum attention to our customers and their **product specifications**.

INJECTION MOULDING

We produce more than **135 million pieces each year**, using more than seven million kilograms of plastic.

ANCILLARY SERVICES

We collaborate with leading companies in their sector, **sharing design and production aspects**, in order to be able to play the role of technological partner and not just a supplier.

WE DON'T LIMIT OURSELVES TO THE BASICS

MOULDING

We offers **established techniques** alongside more recently **introduced techniques** such as overmoulding.

MOULD CONSTRUCTION

We design **customised moulds** and in doing so we provide solutions to **improve products and designs**.

ASSEMBLY

We **assemble the parts we produce** to make sub-assemblies or finished products.

MACHINERY

Our machine park is very extensive and is **designed to meet the specific production and design requirements of each customer**. We have 85 injection moulding machines as well as other quality control, pad printing and ultrasonic welding equipment.

MATERIALS

We process both the most **common plastics and extremely technical** and high-quality materials.

A WINNING PRODUCTION PROCESS

The various departments work closely together to ensure the highest quality of the finished product.

CO-ENGINEERING

Plastics have technical constraints which, if taken into account at an early stage, allow the best **performance at the lowest cost**.

PROTOTYPING

Our technicians carry out an initial prototyping of the product, after which we study possible modifications to **improve the overall quality of the project**.

MOLDFLOW ANALYSIS

It simulates the filling of the mould cavities/cavities **anticipating the evidence** of possible criticalities of the production process.

DESIGN AND MANUFACTURE OF MOULDS

The construction of moulds for plastics is a fundamental part of the process, their construction is essential to **enable the production of a high-performance** finished product.

INJECTION MOULDING

We select the most suitable material and injection moulding machine. We can choose from **horizontal, vertical and twin-cylinder machines**.

ASSEMBLY

If requested by our customers, the plastic **components are assembled** with the remaining parts to form a sub-assembly or even a finished product.

QUALITY CONTROL

During all stages of the production process, our technicians are in charge of control and testing, effectively **verifying compliance with product requirements, critical dimensions and design quality standards.**

CERTIFIED QUALITY

We only offer results that meet high quality standards.

PLOIESTI – ROMANIA (RO)

The **first office** was established in **1987 in Sovere**, in the province of Bergamo, **followed in 1999 by a second** more modern and efficient operating unit. In **2003**, the company inaugurated a **new site in Grone**, and then approached foreign production in **2008 with the first production site in Bacau**, Romania, followed by a **second site, in the same country, in 2018**.

The background of the slide is a close-up photograph of numerous orange-colored plastic pins or fasteners, scattered and overlapping. A solid dark blue rectangular box is positioned on the right side of the image, containing white text. An orange curved arrow points from the bottom right of the blue box towards the bottom right corner of the slide.
